If you
are a TEX user, you al-
ready saw the point of all this.
If you are not a TEX user yet, then
follow the steps: (1) Choose one of the
example pages on this site. (2) Print it.
(3) Start your favourite word processor. (4)
Try to reproduce the printed page; this is
possible for some of the examples with most
word processors. (5) Print the page remade
with your word processor. (6) Put the
printed pages side by side and com-
pare them. (7) If you don't see
the point, choose another ex-
ample and go back to
step 2.
